

## EMBEDDING YOUTUBE VIDEOS

### A. How to include a Mashup

A “**Mashup**” is a feature in Blackboard that allows for the viewing and sharing of media content from external websites.

For this example, you will start in **Week 3**.

1. Click on “**Build Content/Mashups/YouTube Video**”.

2. Rather than opening a new tab and loading YouTube to find a video you want, like you did in previous demonstrations. You simply just need to put the name of the video in the **search bar** seen below. Then click go.

3. Your search will return a number of videos. Simply scroll through and choose the video you were looking for by clicking on "Select".

And it opens directly in Blackboard without opening a new window.

**“Mashup Options”** are also available for **Flickr Photo**, **SlideShare Presentation**, and **Blackboard Open Content**. But for the most part, you will be using **YouTube Video**.

**“Mashups”** can be used in various ways.

- As a stand-alone object like you just did above
- They can also be included as part of a test question, within your assignment. Or even within a discussion board thread that you have created.
